Review fixes verified

1. catalogue.generated.cjs loads in CJS vitest and strip-types ESM child (no fs path).
2. skills:sync --check + docs!”catalogue test.
3. Hard-rule imperatives injected per role map (CFO lacks coding evidence rules).
4. Checklist asserts on composed prompts; applyContextCaps truncates.
5. red/blue egress deny-by-default + explicit local allowlist.
6. CI green including e2e desktop/tablet/mobile.
